Bolivar Technical College reserves the right to modify the terms of this handbook, and other items, without prior notice. Should changes be necessary, appropriate notice will be given. The handbook is published for informational purposes only. Students are subject to the most recent handbook policies, and students must adhere to rules, regulations, and policies as outlined in the Bolivar Technical College student catalog and the Nursing handbook. This handbook should not be construed as constituting a contract between Bolivar Technical College and any person.

Bolivar Technical College

Bolivar Technical College (BTC) is a Not-for-Profit (501(C) 3) Corporation specializing in adult education. The institution is governed by a Board of Directors, administered by the President, and staffed by qualified faculty members. An Advisory Board serves in an advisory capacity.

The members of the Board of Directors are:

President	Charlotte Gray
Vice-President	Dr. William Gray
Secretary/Treasurer	Rachael Heneise

The administrative staff members are:

Campus Director	Charlotte Gray
Registrar	TBD
Assistant Registrar	Chelsye Scantlin
Education Coordinator	Nancy Brannon
Admissions/Student Services	Daniel Leith
Librarian	Jo Bass
Financial Aid Representative	Wendy McGowin/Avril Pebworth
Student Services/Compliance	Avril Pebworth
Director of Nursing Education	Erin Mock, MSN, RN
Simulation & Skills Center Coordinator	Lucinda Schmidt, MSN, RN
Professional Nursing Program Coordinator	Tasha Detloff, MSN, RN
Practical Nursing Program Coordinator	Johnna Mortensen, BSN, RN
RN to BSN Completion Program Coordinator	Kristall Fears, DNP, RN
Student Online Support (SOS) Coordinator	Haleigh Gray

Bolivar Technical College provides quality instruction and an ideal learning environment using multiple modalities, technologies, and experiences to enhance student learning. The college offers Bachelor's Degrees (BSN- completion), Academic Associate Degrees, and Certificates upon satisfactory completion of a program.

Mission Statement

Bolivar Technical College will provide the highest quality educational experience for individuals seeking affordable, personalized, technical programs and general education in response to the ever-changing employment needs of the community.

Philosophy of Nursing Program

Nursing is a science, and an art. Nursing draws upon the biological, behavioral, and social sciences as well as nursing's own unique body of knowledge. Nursing requires ethical behavior critical thinking, problem solving, and effective communication skills. Nursing spans these multiple disciplines to reflect the contemporary health care environment which highlights the continual improvement in safe quality client centered care. The nurse assists the client to achieve an optimal level of wellness through a caring interpersonal relationship.

The faculty recognizes the client is a unique person and an individual that draws on physiological, psychosocial, cultural, developmental, environmental, and spiritual experiences. The individual is viewed in a holistic manner recognizing these variables which impact their healthcare response. The faculty believes the goal of nursing is to assist the person in the pursuit of quality of life as determined by the person. Towards this goal, the nurse is also involved with illness prevention and health maintenance.

Nursing accepts the humanistic approach of valuing the other person's opinions and viewpoints and believes in maintaining the dignity and integrity of the person. The nurse protects the person's confidentiality and the right and ability to make choices. Nursing students will be instructed to view the person as an individual who has the potential to reach an optimal level of health and functioning and not an individual with an illness with the focus on symptoms.

The faculty believes that the nurse's role in the complex healthcare environment is to work collaboratively as peers with interdisciplinary teams and to integrate evidenced based care for the client and community. The ever-increasing complexity of nursing care requires safe practitioners that have the capacity to change and integrate new knowledge and evidenced-based care into safe methods of healthcare delivery.

Nurses should be active continuous learners. Faculty strives to provide learning experiences designed to achieve synthesis of knowledge, values, and skills as outlined by course objectives. While the ultimate responsibility for learning remains with the student, the faculty has the responsibility to provide learning opportunities that encourage intellectual inquiry, critical thinking and fosters evidenced based care and use of informational technology to improve communication and safe, quality client-centered care.

Practical Nursing Program

The practical nursing cohort program at Bolivar Technical College is a 12-month/47-week or 16-month/63-week certificate degree program that prepares students to take the national licensure exam for Practical Nurses (NCLEX-PN). Students are prepared both academically and clinically to care for clients in acute care, clinic, and long-term care settings. Graduates of this program are IV Certified as designated by the Missouri State Board of Nursing.

Professional Nursing Program

The Professional Nursing Program has three Program options: A conventional two-year associate degree option, an LPN to RN Bridge option, and a Paramedic to RN Bridge option.

The conventional professional nursing cohort program at Bolivar Technical College is a twenty month/64-week associate degree program that prepares students to take the national licensure exam for Registered Nurses (NCLEX-RN). No licensure or certification is required for admittance. Students are prepared both academically and clinically to care for diverse clients in the complex, ever changing health care environment.

Licensed Practical Nurses may apply for advanced placement in the Professional Nursing Program. These students will be required to meet prerequisite general education requirements. The program is 3 semesters/47 weeks in length. LPN to RN Bridge students will join the conventional cohort in third semester and upon graduation will earn an associate degree and are prepared to take the national licensure exam for Registered Nurses (NCLEX-RN).

Paramedics may also apply for advanced placement in the Professional Nursing Program. All prerequisite requirements must be met and then students accepted into the program will complete in 3 semesters/47 weeks. Graduates of the program will earn an associate degree and are prepared to take

the national licensure exam for Registered Nurses (NCLEX-RN).

Notice of Non-Discrimination Policy

The college affirms a policy of equal employment opportunity, and nondiscrimination in the provision of educational services to the public. The college makes all decisions regarding recruitment, hiring, promotion, and all other terms and conditions of employment without discrimination on grounds of race, color, creed, religion, sex, sexual orientation, ancestry, national origin, age, genetic marker, disability, or any other characteristic which lawfully cannot be the basis for an employment decision by state, local, or federal law.

The college is obligated by and adheres to the provisions of:

- Section 493A, Title IV, Higher Education Act of 1965 as amended
- Title 38, United States Code, Veteran’s Benefits
- Title IX, Education Amendments of 1972
- Section 504, Rehabilitation Act of 1973
- Family Education Rights and Privacy Act of 1974 as amended
- Drug-Free Schools and Communities Act Amendments of 1989

Inquiries concerning the application of these laws and their implementing regulations may be referred to the College president.

Bolivar Technical College complies with Section 504 of the Rehabilitation Act of 1973 and makes every effort to ensure that disabled persons admitted as students or employed by the college are afforded all of the rights and privileges provided to them by this state and federal laws. Bolivar Technical College is committed to providing a sound learning environment to academically qualified students with disabilities. Students must provide complete current documentation of accommodations required to the administrative office. Bolivar Technical College requests that documentation for an existing disability be submitted prior to beginning a program. Newly diagnosed disabilities with accommodation requirements should be submitted to the administrative office as soon as available to the student. Accommodations provided by BTC will be determined based on documentation submitted, in conjunction with non-discriminatory policies, then communicated to the faculty with the consent of the student.

Academic Information and Policies

Grade Point Average (GPA) for all Nursing Courses

Evaluations for each class within the program receive a specific number of points. The grade for each nursing class is determined by tests, quizzes and other assignments and a comprehensive course final; thus, reflecting mastery of the course material based on the percentage of the total points scored as being correct. The percentage is then calculated on the following scale for core nursing classes:

<u>Letter Grade</u>	<u>Percentage Grade</u>	<u>Grade Points</u>
A	94-100%	4.00
B	86-93%	3.00
C	80-85%	2.00
F	below 80%	0.00

Grades are not rounded for any class. 79.99 is less than 80.0 and is an “F” in nursing classes.

Each certificate and degree program course syllabus will articulate required course work including student assignments outside of class with specific requirements. Outside of class work will be consistent with program objectives, documented, assessed/graded and will be an integral part of the sequenced educational program.

Grade Point Average (GPA) for all General Education Courses

<u>Letter Grade</u>	<u>Percentage Grade</u>	<u>Grade Points</u>
A	90 – 100%	4.00
B	80 – 89%	3.00
C	70 – 79%	2.00
D	60 – 69%	1.00
F	Below 60%	0.00

Grades are not rounded for any class. 59.99 is less than 60.0 and is an “F” in general education classes.

Grade point average is calculated by multiplying the credit hours by the earned grade points. The sum of this number is divided by total possible number of credit hours.

For example:

Course grade	A	3 Credits	4 points = 12
Course grade	B	12 credits	3 points = 36
Course grade	C	3 Credits	2 points = 6
Total		18	54

Divide 54 by 18 = 3.0 GPA

Late Work and Make-Up Work Policy

It is the student’s responsibility to report to the course instructor immediately after an absence to make up any missed tests and assignments.

The following policies are in effect for absences during all courses:

1. NO student will be given the opportunity to take a test/quiz early **for any reason. No Final Exam will be given early or late.**
2. Homework is considered late if not turned in on or before the time designated by an instructor. The office will document the receipt of an assignment even if class is not in session, but the campus is open.
3. Tests and quizzes are considered late if not taken at the designated testing time. It is the responsibility of the student to schedule a make-up time with the instructor.
4. Ten percent (10%) will be deducted from homework, tests, and quizzes not completed by the designated testing time/due date. (Day 1). An additional ten percent (10%) will be deducted each day the college campus is open following the designated testing time/ due date.
5. After 7 calendar days no points will be awarded for late homework, tests, or quizzes.
6. All exams must be taken prior to the next exam, regardless of points awarded.
7. Assigned exam remediation, if required, is due prior to the next exam.
8. If an exam has not been taken at the time of the next exam, or assigned remediation not completed, the next exam cannot be attempted, and the late penalty will be

- applied for each day that it is not attempted.
9. Individual circumstances of illness and emergency will be considered on a case-by-case basis by appeal to the program director. Documentation must be presented upon return to school.

Academic Progress

Academic Achievement and Retention

Professional Nursing and Practical Nursing students must reach and maintain grades of “C” or higher in nursing core classes and general education classes. Grades will be monitored, and request for an improvement plan may be issued for a student’s average that falls below 82% in a core nursing class. In addition, failure to master course or clinical objectives may require remediation. The program coordinator or faculty member(s) responsible for the subject matter or clinical specialty will assist the student to formulate a plan and will monitor the student’s progress along with the timeline within which the student is to demonstrate mastery of the material or clinical skill(s). The plan will be kept in the student’s file. The student must successfully complete the remedial plan according to the timeline determined by the faculty. Evaluation of mastery will be required and documented. Students who fail to achieve at least 80% in a core nursing class or a “C” grade or higher in a general education class by the end of the semester will be terminated. Clinical components of theoretical courses are an integrated requirement for that specific course, and clinical components must be mastered in order to pass the corresponding course.

Clinical evaluations will be completed for each clinical day and available for review. Students are responsible for reviewing the formative Clinical Evaluation Tool (CET) and using instructor feedback for clinical performance improvement. Clinical instructors may assign remediation as needed. A student will be terminated if he/she fails the clinical component of a course.

Course grades are made available to students through Moodle. The student is responsible to monitor his/her own grade averages and test scores. Students are strongly urged to request faculty guidance and assistance with any curriculum material or any clinical objective(s) that he/she is having difficulty mastering. Students may sign up for Success Lab for additional help.

An ATI subject specific comprehensive computerized exam for each applicable subject area will be given prior to the end of each appropriate semester. The student is expected to obtain a minimum of a Level 2 competency (Proficiency = Level 2 or higher).

1. If a student achieves a non-passing score of Proficiency Level I or below, NO score is recorded, and student must begin remediation.
2. Student will complete remediation and submit by the deadline given.
3. The student will pay \$50.00 fee to retake the proctored exam.
4. Students have ONE (1) opportunity to retest.

ATI assessment exams will be given a specific point value included in the total points for each specific course.

1. Level 3 Proficiency = 100% of ATI assessment points with 15-minute Focused Review.
2. Level 2 Proficiency = 88% of ATI assessment points with 30-minute Focused Review.
3. Level I Proficiency or below = 0 points until retest is completed with 60-minute Focused Review.
4. Below Level I Proficiency score will require a retake and 90-minute Focused Review.
5. Student’s score on retake exam will be recorded as follows:
 - Level 2 or higher = 78% of ATI assessment points

- Level I = 68% of ATI assessment points
- Below Level I = 58% of ATI assessment points

At completion of the program, a comprehensive ATI exam is given. The student is expected to achieve a 95% predicted probability. A student that obtains a predicted probability of below 95% must remediate to receive the points possible. A student that obtains a predicted probability of below 90% must remediate and retake the ATI comprehensive predictor to receive the points possible. The cost for the additional testing is paid by the student. The percentage of the first predicted probability will be the percentage of ATI assessment points earned. (i.e., a 92% predicted probability will result in 92% of ATI assessment points)

Professional Nursing ATI Exam	First Semester	Second Semester	Bridge Semester Only	Third Semester	Fourth Semester	Scoring Methods
Critical Thinking						
Pre-test	X		X			
Post-test					X	
Content Mastery Exams (CME)						CME Levels – 1st attempt Level 3 = 100% of assigned points Level 2 = 88% of assigned points Below Level 2: see ATI policy & process for remediation/retesting
RN Fundamentals	X					Points awarded within the ADN-RN 101 course (Fundamentals of Nursing)
RN Pharmacology				X		Points awarded within the ADN-RN 114 course (Pharmacology III)
RN Mental Health				X		Points awarded within the ADN-RN 210 course (Mental Health)
RN Maternal Newborn					X	Points awarded within the ADN-RN 241 (Maternal Child)
RN Nursing Care of Children					X	Points awarded within the ADN-RN 241 (Maternal Child)
RN Leadership					X	Points awarded within the ADN-RN 250 course (Management & Leadership)
RN Adult Medical Surgical					X	Points awarded within the ADN-RN 230 course (Medical Surgical Nursing III)
Comprehensive Exit Exam						This test will generate an individualized score (% Correct), indicating predicted probability to pass NCLEX-RN®.
RN Comprehensive Predictor					X	Points will be equitably divided between the fourth semester courses

Failure to demonstrate mastery of the clinical or course objectives may require the student to withdraw from the program or result in termination from the program.

Practical Nursing ATI Exam (3-semester track)	First Semester	Second Semester	Third Semester	Scoring Methods
Critical Thinking				
Pre-test	X			
Post-test			X	
Content Mastery Exams (CME)				CME Levels – 1st attempt Level 3 = 100% of assigned points Level 2 = 88% of assigned points Below Level 2: see ATI policy & process for remediation/retesting
PN Fundamentals	X			Points awarded within the NURS 112 course (Fundamentals of Nursing)
PN Maternal Newborn		X		Points awarded within the NURS 204 course (Maternal Child I-OB)
PN Pharmacology			X	Points awarded within the NURS 302 course (Pharmacology III)
PN Mental Health			X	Points awarded within the NURS 323 course (Mental Health)
PN Nursing Care of Children			X	Points awarded within the NURS 304 course (Maternal Child II-Peds)
PN Management			X	Points awarded within the NURS 343 course (Leadership)
PN Adult Medical Surgical			X	Points awarded within the NURS 313 course (Medical Surgical nursing II)
Comprehensive Exit Exam				This test will generate an individualized score (% Correct), indicating predicted probability to pass NCLEX-PN®.
PN Comprehensive Predictor			X	Points will be equitably divided between the third semester courses

Failure to demonstrate mastery of the clinical or course objectives may require the student to withdraw from the program or result in termination from the program.

Practical Nursing ATI Exam (4-semester track)	First Semester	Second Semester	Third Semester	Fourth Semester	Scoring Methods
Critical Thinking					
Pre-test		X			
Post-test			X		
Content Mastery Exams (CME)					CME Levels – 1st attempt Level 3 = 100% of assigned points Level 2 = 88% of assigned points Below Level 2: see ATI policy & process for remediation/retesting

Comprehensive Exit Exam					This test will generate an individualized score (% Correct), indicating predicted probability to pass NCLEX- PN®.
PN Comprehensive Predictor				X	Points will be equitably divided between the third semester courses

Failure to demonstrate mastery of the clinical or course objectives may require the student to withdraw from the program or result in termination from the program.

Academic Counseling

Individual faculty and administrative staff are available to students during regular office hours for discussion of course or program academic concerns. Students experiencing academic difficulties are encouraged to meet with course instructors to determine a plan for improving the student's academic standing. BTC "Success Lab" is available to nursing students who desire to have additional instruction and/or practice of skills. Success Lab may also be assigned to a student for remediation in an area identified as needing improvement. Faculty may assist students in study habits and provide tutoring concerning specific content. The staff may make referrals to outside resources. Success Lab is integrated into the weekly schedule of the PN program.

Code of Academic Integrity

Bolivar Technical College is an academic community whose fundamental purpose is the pursuit of knowledge. It is believed that academic integrity is vital to the success of this educational endeavor and without it, the opportunity to develop the full understanding of the material is missed (Harding, Carpenter, Finelli, & Passow, 2004). The value of education awarded by an institution is based on the belief that graduates earn their education honestly, and that graduates have the knowledge and skills inherent to that education. The faculty at Bolivar Technical College believe that quality education leads to quality care. The college accepts this responsibility to the community and to the profession of nursing by expecting academic integrity of students and faculty.

The highest standards of ethical and professional conduct are integral to success in the nursing programs. As members of the nursing profession, the student shares a commitment to adhere to the American Nurses Association Code of Ethics for Nurses. The faculty's duty is to maintain an environment supportive of personal growth, as well as to ensure the provision of safe and effective health care to the public.

The nursing faculty at Bolivar Technical College believes students who develop the values of nursing during their course of study will portray those values as a nurse. The values of nursing include lifelong learning, diversity, individuality, respect, responsibility, and integrity. These values are essential to continued success in the profession of nursing.

Code of Ethics for Nurses

1. The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.
2. The nurse's primary commitment is to the patient, whether an individual, family, group, community, or population.
3. The nurse promotes, advocates for, and protects the rights, health, and safety of the patient.
4. The nurse has authority, accountability, and responsibility for nursing practice; makes decisions, and takes action consistent with the obligation to promote health and to provide optimal care.
5. The nurse owes the same duties to self as to others, including the responsibility to promote health and safety, preserve wholeness of character and integrity, maintain competence, and continue personal and professional growth.
6. The nurse, through individual and collective effort, establishes, maintains, and improves the ethical environment of the work setting and conditions of employment that are conducive to safe, quality health care.
7. The nurse, in all roles and settings, advances the profession through research and scholarly inquiry, professional standards development, and the generation of both nursing and health policy.

8. The nurse collaborates with other health professionals and the public to protect human rights, promote health diplomacy, and reduce health disparities.
9. The profession of nursing, collectively through its professional organizations, must articulate nursing values, maintain the integrity of the profession, and integrate principles of social justice into nursing and health policy.

[American Nurses Association \(2015\)](#)

Attendance Policy

Good attendance is a mark of dedication which is a component of professionalism that future employers consider seriously. Students are expected to attend and participate in all classes in order to get maximum benefits from the instructional program and to develop the habits of punctuality, self-discipline, and responsibility.

Students enrolled in **seated courses** will be counted present for the time attending class while distance education courses will have attendance recorded by participation in academic events. An academic event for distance education courses is defined by submitting a class assignment, participating in threaded discussions, completing quizzes and exams, or completing synchronous activities as required.

Students enrolled in **seated courses** must attend (be present in class) a minimum of 90% of time scheduled for the course. This includes clinical time if applicable.

- *Example:* a 3-credit hour course will be scheduled 45 in-person class hours (3 hours weekly for 15 weeks). Therefore, the student must attend 90%, or 40.5 hours.

Students enrolled in **distance education (online courses)** will have weekly scheduled assignments in place of in-person attendance. Participation in the assignments results in being 'present'. Students must maintain a 90% minimum attendance in each course, based on assignment participation. The number of events assigned in a week is a direct reflection of the course credit hours earned.

- *Example:* a 3-credit-hour course will have weekly assignments scheduled in place of in-person class time. Students should anticipate 2 hours of work for each online credit hour earned weekly (3 credit hours x 2 hours = 6 hours weekly).
- Participation in a weekly assignment prior to the scheduled due date counts as class attendance. (All assignments complete for the week = present all hours)
 - Students who do not participate in an assignment will be counted absent for that assignment's weekly time equivalent.
 - If no assignments are attempted, the student will be counted absent for all hours.

Students enrolled in a **hybrid course** must also maintain a minimum attendance of 90% and will have attendance components of seated and distance education (see above). Students are responsible to maintain minimum attendance requirements in both components. Hybrid courses

are delivered in a flipped classroom format with 2 credit hours of work assigned online prior to attending class, and 1 credit hour of seated class each week.

- *Example:* a 3-credit-hour hybrid course will have two components—weekly assignments to be completed at home prior to class and one hour of in-person class attendance.
 - Students must participate in all the online assignments prior to the scheduled due date to be counted present for those hours.
 - Students who participate in none of the weekly assignments are counted absent.
 - Students who participate in only part of the weekly assignments will be counted absent for the missed assignment's time equivalent.
 - Students must also attend the scheduled seated portion of the class weekly to be counted present for those hours. (1 hour weekly for 15 weeks)
- **Students are to maintain a minimum of 90% attendance, or higher, for each semester.** Clinical hours are included in the same semester. If a student misses the number of hours where he/she is unable to obtain 90% attendance by the end of the semester the student will be dismissed from the program. **Due to the nature of the Practical Nursing cohort and Professional Nursing cohort programs, attendance probation is NOT an option for those programs.**
- Extenuating circumstances will be considered on a case-by-case basis. Documentation for extenuating circumstances must be submitted within **seven calendar days of return to class.**
- All missed clinical hours **MUST** be made up. Time made up for clinical rotations does not decrease the total number of hours missed.
- Work missed for any course is subject to the Late Work and Make-up Work Policy.
- **The school or clinical instructor must be notified by the student at least one hour prior to the report time if the student is going to be late or unable to attend class or clinical rotation. If class is scheduled to begin at 0800 a call must be received no later than 0700. Non-compliance with calling is considered a “no call, no show” and may be grounds for dismissal. Sending a message by another student is not acceptable.**

Phone number is: Bolivar Technical College (417) 777-5062

The school has staff to answer calls at 0700.

The instructor must be contacted by 0530 for clinical rotation.

- Doctor's visits and other appointments should be scheduled beyond school hours.
- **Any absence of 3 consecutive days or longer due to illness will require a doctor's written statement.** Illness verification by a doctor may also be required any time as deemed necessary by the Director.
- Any **hospitalization** requires a release from the doctor to return to class/clinical.
- Tardy policy: students must be in their seats, prepared for class, at the time class is scheduled to start. The door will be closed, and no one will be admitted until the next scheduled break. The same rule applies for exams. A student may leave the room but will not be permitted to reenter until the next break. Students will be counted absent when not in the classroom.
- Early departures will be calculated as follows: Departing 1-15 minutes early will result in one quarter of an hour added to the total hours missed. 16-60 minutes early will result in

1 hour added to total hours missed.

- Faculty are under no obligation to offer extraordinary assistance to students who are chronically absent.

Clinicals

Part of the educational program is offered in a health-care facility that is contracted to provide instructional opportunities for nursing-related activities. Students are required to participate and be eligible to participate at all assigned clinical sites. NO EXCEPTIONS. Students must also comply with the facilities' policies and procedures. The school is not obligated to locate an additional clinical site to accommodate a student for any reason. Eligibility to attend a clinical site may impact the student's ability to complete the program.

Courses with a clinical component require mastery of the clinical objectives to successfully complete the course. Clinical objectives and associated competencies are listed in each course syllabus and/or reflected in the Clinical Evaluation Tool (CET). Each clinical rotation of a semester, the student will receive a formative evaluation on the CET. It is the student's responsibility to review their CET weekly and faculty feedback should be utilized by the student for improvement. Students will receive daily marks of Exemplary (E), Accomplished (A), Needs Improvement (NI), or Unsafe (U) on the CET. Based on the daily CET scores, the student's clinical site performance, and the student's clinical paperwork, the clinical day will be marked a pass or fail on the CET. Clinical remediation will be assigned at the discretion of the clinical instructor. Academic Nurse Preceptors may provide an evaluation of students, but BTC faculty award final grades.

Students may be assigned Success Lab for clinical or simulation remediation, however, students may also request a Success Lab for any clinical skill that they wish to practice.

Students who receive a clinical failure on the CET will be required to participate in the following, based on the total number of fails on their CET in a semester:

- First clinical fail on CET: meet with clinical instructor.
- Second clinical fail on CET: meet with program coordinator.
- Third clinical fail on CET: meet with clinical faculty panel and Director of Nursing Education.
 - Student may be required to demonstrate clinical competency.
 - Student may be dismissed from program.

All clinical objectives must be mastered to successfully complete the corresponding course. Students will be sent home from the clinical setting for unsafe or unprofessional behavior and will awarded a clinical fail for the day. In addition, termination from the program may be warranted.

Clinical Absences

Students are expected to attend all scheduled clinical experiences, including Clinical, On-Campus Clinical, and Simulation experiences. Attendance consists of arriving on time, dressed according to the dress code for that experience, and prepared to work. Any absence must be reported to the appropriate faculty prior to the time the students is expected to arrive. All missed clinical time MUST be made up. Making up clinical time does not remove it from the student's attendance record. Student absences due to extenuating circumstances* will be considered on a case-by-case basis.

*Extenuating Circumstances:

Unforeseen events such as an auto accident, deaths in the immediate family (see policy), or personal illness which requires a student to be hospitalized may be viewed as an extenuating circumstance. In the case of such events, the student must notify faculty members as soon as possible. *Vacations, weddings,*

doctor appointments, studying for an exam, childcare issues, job interviews, new job orientation, working, etc. are not considered extenuating circumstances as these are not unforeseen events. Students wishing to claim extenuating circumstances will be asked to provide documentation of the condition that led to absenteeism. The presence of extenuating circumstances does not guarantee that a student will be exempted from this attendance policy.

Absences:

If a student demonstrates patterns of behavior that includes tardiness and absences, they will be subject to progressive policy enforcement and may be at risk of failing the course. The student is required to establish a remediation plan with the Program Coordinator and may be required to complete an activity, assignment, or clinical hours as decided by the Program Coordinator. The Program Coordinator or Director of Nursing Education may request documentation of the condition that led to absenteeism. Absences are cumulative within a semester whether because of absenteeism or tardiness.

Student Clinical Absence WITH Appropriate Notification (Also used for progression of Tardiness):

1. The student must notify the Program Coordinator or the Skills and Simulation Coordinator as soon as possible and **before** the beginning of their clinical experience.
2. With the first clinical absence, the student is required to make up the scheduled clinical time at the discretion of the Program Coordinator. The student will pay the clinical make-up fee of \$50/hour.
3. If a second clinical absence occurs; the student is required to make up the scheduled clinical time at the discretion of the Program Coordinator and will pay the clinical make-up fee of \$50/hour. The student will also establish a remediation plan with the Program Coordinator.
4. If a third clinical absence occurs (or more); the student will meet with the Program Coordinator and Director of Nursing Education to review/update the remediation plan and is at risk of failing the course.

Student Clinical Absence WITHOUT Notification (No Call No Show):

**** A No Call No Show (NCNS) is when the Program Coordinator has not been contacted by the student within an hour of the clinical start time. (i.e.: Clinical scheduled for 0630, the student is absent and has not contacted the school by 0730 and will be counted as a NCNS.)**

1. The first no call no show will result in clinical failure, counseling, and an assigned remediation plan in addition to make-up of the scheduled clinical time at the discretion of the Program Coordinator. The clinical make-up fee of \$50/hour will be assessed.
2. The second no call no show; will result in failure of the course.

Tardiness:

Tardiness is defined as arrival to the designated clinical unit or meeting place ***any time after the designated start of clinical.***

In the event the student anticipates clinical tardiness, the faculty must be notified immediately.

1. Students arriving (on the floor, ready to work) to the clinical site 1-29 minutes late will be reported to the Program Coordinator. The Coordinator will counsel the students and MAY assign a remediation, additional assignments, and/or clinical make-up with the \$50/hour fee. Minimum time assigned in clinical make-up is 1 hour, regardless of time tardy.
2. If a student is more than 30 minutes late to clinical the Program Coordinator WILL assign remediation and clinical make-up time of 1 hour with fee of \$50/hour.
 - a. If the student is more than 1 hour late, the student will be sent home from the clinical site and will be counted absent. The absence policy will be followed based on total number of absences the student has earned.
 - b. Clinical make-up and charges will be assessed in whole hour increments.

3. A second (or more) episode(s) of tardiness (arriving any time after the designated start of clinical) will be counted as an absence regardless of when the student arrived at the clinical site (Follow *Absences* policy). The student will be allowed to stay at the clinical site if arriving within the first scheduled hour. The student will be awarded a clinical failure.
 - a. If the student is more than 1 hour late, the student will be sent home from the clinical site and awarded a clinical failure.

Dismissal of a Student from a Clinical Site:

If a student is dismissed from a clinical site or simulation because of inappropriate uniform, preparedness (including incomplete prework), or failure to meet clinical expectations for care or professionalism, the student will be subject to clinical make-up with \$50/hour make-up fee, additional assignment or activity, remediation plan, or a combination of these at the discretion of the Program Coordinator based on the event that led to the student's dismissal. Students will receive a clinical failure and may be dismissed from the program.

Clinical and Skills Lab Conduct Code

- The student is required to always maintain patient confidentiality. **Any** breach in confidentiality could result in termination from the nursing program.
- The student is required to always maintain confidentiality in ANY clinical/skills activity. This includes, but is not limited to, simulation labs and class skills labs. Sharing of simulation lab scenarios with other students is considered disclosing of information or unauthorized collaboration between students and is considered academic dishonesty. Academic dishonesty is grounds for termination.
- Students may not work an overnight shift prior to their clinical rotation. If it is determined that a student has worked an overnight shift prior to their clinical rotation, the student will be sent home, not be allowed to attend that clinical day, and will be required to make up the missed clinical hours. Missed clinical hours are made up at \$50.00 per hour. According to state regulations, nurses are not allowed to work more than sixteen hour (16) continuous hours.
- The student must be covered by a student nursing liability insurance throughout the course of study and is provided by the school.
- Gum chewing is prohibited during clinical rotations.
- Students are not to leave the clinical unit without express permission from the instructor or supervising nurse.
- No pagers or cell phones or other electronic devices (excluding class/clinical assigned devices) are allowed during the clinical rotation while in patient care areas. This policy may be superseded by facility policy if the facility's policy is more restrictive.
- Families may contact the school in case of emergencies. A school employee will notify the student/clinical instructor or supervising nurse responsible for that area and she/he will notify student. NO PERSONAL CALLS DURING CLINICAL OR SIMULATION.
- Smoking is not allowed during the clinical rotation or pre-conference hours. Tobacco odor stays on uniforms and is offensive to many clients. Students will be sent home if smelling of smoke or other offensive odors and will be required to make up the

- clinical day, per the make-up policy.
- The use of alcoholic beverages and/or drugs (illegal or prescription abuse) during regular school hours on school property, during clinical hours or pre-clinical preparation hours is strictly prohibited and is grounds for dismissal.
 - The use of prescription medication that alters cognitive or physical functioning is not permitted during pre-clinical preparation and clinical rotations.
 - Children are not allowed at clinical or instructional facilities.
 - Simulation days are considered clinical experience and expectations and penalties are equivalent.

Clinical and Skills Lab Dress Code

- The student must wear required clinical attire according to the course description and/or clinical protocol.
- The school uniform is to be clean, without wrinkles, and should not be worn outside of the clinical day. The school uniform includes: *white scrub top, blue scrub pants, white tennis shoes, BTC nursing T-shirt, and white undershirt. Name tag and identification patch must be worn during all clinical rotations. * Starting with the Fall 2024 Professional Nursing cohort, the scrub top will be blue, coordinating with the blue scrub pants.
 - Students may purchase a specified blue lab coat to match the scrub pants, if desired.
- No additional accessories or pins may be worn with the school uniform.
- Undergarments worn with the nursing uniform and at clinical rotations must be white or skin-colored and non-revealing. Brassieres must be worn by female students. White undershirts may be worn under uniform top.
- Long hair must be pulled away from the face so that it does not contaminate clean areas. Bangs must not obstruct student line of sight.
- Hair must be neat, clean, and off the collar.
- Men's faces are to be either clean shaven or beards short/trimmed and groomed.
- Uniform shoes must be white and kept clean. (White polish is essential.)
- The student may wear a plain band ring only. (*Stones may scratch clients or cause skin tears.*)
- ONE pair of stud earrings may be worn on the ear lobe; earrings not permitted in any other part of the ear. Clear spacers can be used in place of gauges. (*No hoops, dangling earrings, or colored gauges. These may get caught and ripped out of ear.*) Daith piercing permitted with a doctor's note.
- No smart watches, Fit Bits, or other electronic devices. Watches must be analog or digital, waterproof, and with a flexible band.
- One stud nose ring may be worn. No other piercings are permitted, including eyebrows, tongue, umbilical rings, etc.
- Wearing any jewelry presents a risk for injury or infection and is undertaken at the student's discretion.

- Natural colored contacts only.
- Only natural hair colors allowed in clinicals, skills & simulation center.
- Students must be clean and well groomed. No offensive body odors (including perfumes, scented products, etc.)
- Most tattoos may be visible if deemed unoffensive*. Tattoos on the head, face, neck, and scalp must be covered, regardless of content.
- No midriffs may be exposed.
- No false nails may be worn. Nails must be cut short, not to extend more than 1/8th inch from the fingertips. Nail polish is not allowed during clinical rotations, including shellac and dip polish.
- Faculty may send students who do not meet the dress code requirements home from the clinical rotation. Clinical time must then be made up at the student's expense.

*Bolivar Technical College and our partnering clinical sites reserve the right to deem a tattoo offensive. Examples include tattoos that convey violence, discrimination, profanity or offensive language, sexually explicit depictions, gang affiliation, extremist philosophy, or depiction of illegal activity or illegal symbols. Bolivar Technical College will defer to the clinical site recommendations and policy if a tattoo is deemed offensive by that clinical site, even if previously approved by the college.

Clinical Health Policy

Students will not be able to attend clinical rotations due to safety concerns for clients and other staff, faculty or students if the student is exhibiting one or more of the following health issues:

- Elevated temperature (100.4 ° Fahrenheit or above)
- Vomiting or Diarrhea
- Cognitive deficits
- Signs or symptoms of communicable diseases
 - i.e. pink eye, strep throat etc. which have not been treated for 24 hours with antibiotics.
 - i.e. cold, flu with fever in the last 24 hours.
- A positive COVID-19 test (home tests must be verified) per the most current CDC and facility recommendations.

Students missing clinical or sent home due to any of the above issues will be **required to make up clinical time** missed at the student's expense of \$50.00 per clinical hour missed, per the clinical absence policy.

Program Termination

A student may be terminated from the nursing program due to excessive absenteeism, unprofessional or unethical conduct, failure to master course or clinical objectives, violation of rules and regulations, unpaid tuition, falsifying application information, or academic dishonesty. In addition, nursing students may be dismissed from the program based on patient care safety issues, a positive drug screen without appropriate documentation, or failure to maintain clinical site expectations.

Grievance and Appeal Policy

The successful accomplishment of the school's mission requires prompt consideration and equitable

adjustment of any appeal or grievance. It is the desire of the administration and staff to address appeals or grievances informally, and the supervisors, instructors, employees, and students are expected to make every effort to resolve problems as they arise.

Students have the right to appeal any action or decision that directly affects their academic performance or records such as grades, probation, warnings, suspension of financial aid or dismissal from a program, etc. due to not making satisfactory academic progress. **Grievances or appeals submitted that are signed by a group will not be addressed.** The student should first appeal a decision from the person who initiated the action.

An appeal regarding a final grade should be made within fifteen business days of the last day of a class and should initially be addressed to the instructor of the class. If a student is not satisfied with the result, the student may file an appeal following the steps listed below.

Appeals may be granted based on error or unanticipated mitigating circumstances, which may include, but are not limited to: Loss of transportation, civic duties, conflicting personal responsibilities, illness, death of a close relative, etc. that may affect a student's attendance or classroom performance. The grievance and appeal policy outlined below does not apply to actions taken in response to positive drug screens. Please refer to substance abuse policy on page 24.

When an appeal is requested, suspension of financial aid or dismissal from a program is delayed until the appeal has been decided. Students who have appealed are expected to continue in their program until the appeal is decided. When an appeal is not granted, the date of suspension of financial aid or dismissal from a program will be the date of the original action. Should the student withdraw immediately following the denial of an appeal, the student will not be charged for any attendance following the date the student was originally suspended from financial aid or dismissed from a program.

Step 1: Students with a complaint relating to a particular class or instructor should discuss it first with that instructor. If the complaint is not resolved satisfactorily, within three (3) business days following the documented meeting with the instructor, the student should present his/her complaint as outlined in Step 2.

Step 2: A student may present his/her grievance to the program director (or campus director as applicable). All grievances will be submitted in writing. If a satisfactory solution is not achieved, within another three (3) business days from the receipt of the campus director's decision, the student may proceed with Step 3.

Step 3: A student may then present the grievance to the Bolivar Technical College president. All grievances will be submitted in writing. If a satisfactory solution is not achieved, within another three (3) business days from the receipt of the president's decision, the student may proceed with Step 4.

Step 4: A student may then present the grievance to the Board of Directors. The student has three (3) business days to present the grievance in writing to the Board of Directors after Bolivar Technical College's president has decided. The decision of the Board of Directors is final.

Students not satisfied with the final resolution of the appeal and grievance policy may submit complaints to:

Accrediting Bureau of Health Education Schools (ABHES)
6116 Executive Blvd., Suite 730
North Bethesda, MD 20852
301-291-7550

Missouri Department of Higher Education &
Workforce Development
301 W. High Street
PO Box 1469
Jefferson City, MO 65101-1469
Phone: (573) 751-2361 or
(800) 473-6757
Email: info@dhewd.mo.gov

Graduation Requirements

To graduate, students must have earned a minimum cumulative grade point average of 2.00 and successfully completed the required number of courses in their program of choice within the maximum number of credits that may be attempted. Students must have a grade of “C” or higher. Upon satisfactory completion of their program, students will receive a Certificate or Associate Degree.

NCLEX Review Requirement

The college schedules an NCLEX live review for all nursing students the week following program completion, and students are required to attend the entire NCLEX review. Once verification of attendance at the review has been turned in to the administrative office staff, and all other graduation/financial obligations are met, those students who attend ALL sessions of the NCLEX review offered through the college will have official transcripts sent to the Board of Nursing.

Students who cannot or choose not to attend all of the scheduled NCLEX review at the college may select from a list of pre-approved NCLEX reviews (list available in the administrative office). Upon successful completion of an alternate review course, students must provide documentation to the registrar showing proof of completion. Students taking an alternate NCLEX review are responsible for cost incurred.

Requirements for State Licensure

- A. Successful completion of the Nursing Course of Study. Meet all requirements of the Nursing Program.
- B. Successful completion of the course of study does not guarantee eligibility to take the licensure examination.

All applicants, students, and graduates are hereby notified that the Missouri State Board of Nursing may refuse to issue a license for specific reasons related to moral turpitude, intemperate use of alcohol or drugs, or conviction of a crime. The Nursing Practice act and rules can be found on the Missouri State Board of Nursing webpage at <http://www.pr.mo.gov/boards/nursing/npa.pdf>. Section 335.066, RSMo, as shown on pages 17-20 in the Nurse Practice Act lists grounds for possible denial of licensure. The Missouri State Board of Nursing will grant or deny eligibility to test after submission of application for nursing licensure.

1. Students can petition the Missouri State Board of Nursing for a criminal history determination at any time in writing using [this form](#).
- C. Validation of status for taking examination will be forwarded to the applicant from the NCSBN—this is known as the Authorization to Test (ATT). Information related to completion of the NCLEX Exam will be included.
- D. CAT - Computer Adaptive Testing-NCLEX Exam is to be taken and passed at the first

opportunity.

General Information and Regulations

Tobacco-Free Facilities

Effective July 1, 2013, BTC is a tobacco free school and campus.

The tobacco-free policy prohibits the use of tobacco products in our college and all adjacent areas. Tobacco products cannot be used by students/employees anywhere on the grounds or inside the facilities.

Furthermore, students/employees may not smoke, use tobacco, or vape in any form while wearing their BTC ID badge, at any clinical facility, or college activity representing BTC.

Students/employees may NOT smoke in their vehicles while on campus. Employees/students with an offensive odor in their clothing may be asked to change or be sent home on their own time to change clothes.

The administration recognizes that smoking is a personal choice, and students/employees may smoke or use other forms of tobacco while off duty and off college grounds as long as they are not representing BTC in an official capacity.

Breaks

Breaks may be taken in designated areas. All break areas must be cleaned after use. Food & drinks will be allowed in designated areas only. No food in the classrooms, computer labs, science lab, or skills & simulation center. Drinks are permitted in the classrooms.

Employment

It is recommended that students work no more than 16 hours per week and should not work at all if not maintaining a "C" in theory and/or practice.

Inclement Weather Policy

Extreme weather may require Bolivar Technical College to cancel classes. Information regarding class cancellation will be available on local television and social media. If no announcement is made, it may be assumed classes will be in session. Nursing students in a semester with a clinical component will be advised of notification procedures pertaining to inclement weather by their clinical instructors.

If students believe road conditions are unsafe near their home, they are responsible for contacting the instructor.

Days missed due to inclement weather will be made up, and regularly scheduled days or holidays may be required as make-up days. Every effort will be made to post make-up days as soon as possible.

Missouri State Board of Nursing Position Statement Regarding HIV or HBV Infection

The Missouri State Board of Nursing recognizes the serious implications the spread of HIV or HBV has on the health, safety, and welfare of the public and the Board's mandated responsibility to the public for assuring safe and competent nursing care.

As mandated by Section 191.694 RSMo, 1992 all licensed nurses and nursing students shall immediately implement and adhere to the universal precautions recommended by the Centers for Disease Control in the care of all clients.

All licensed nurses and nursing students who discriminate against a client on the basis of HIV or HBV infection, or makes HIV or HBV testing a condition of treatment shall be subject to the denial of licensure or the disciplinary processes of the Missouri State Board of Nursing.

All licensed nurses and nursing students with HIV or HBV who perform invasive procedures are encouraged by the Missouri State Board of Nursing to voluntarily participate in the Department of Health's evaluation process.

All licensed nurses and nursing students who violate a restriction or limitation placed on their practice by the Department of Health shall be subject to denial of licensure or the disciplinary processes of the Missouri State Board of Nursing. It is the position of the Missouri State Board of Nursing that all licensed nurses and nursing students with HIV or HBV are entitled to the same reasonable accommodation guaranteed by the Americans with Disabilities Act.

BTC Blood Borne Pathogen Prevention and Clinical Exposure Policy

The increasing prevalence of blood borne pathogens increases the risk that health-care workers will be exposed to blood/body fluids from patients infected with bloodborne pathogens, especially when blood and body-fluid precautions are not followed for all patients. Therefore, health-care workers are to consider ALL patients as potentially infected with blood borne pathogens and to adhere rigorously to infection control precautions for minimizing the risk of exposure to blood and body fluids of all patients. The [Center for Disease Control and Prevention \(CDC\)](#) has issued guidelines regarding occupational exposure to blood borne pathogens (including HIV, Hepatitis B and Hepatitis C). Bolivar Technical College has adopted the following policies in conformity with CDC guidelines: The following policies are your first line of defense against HIV, Hepatitis B and Hepatitis C, but also against all Blood Borne Pathogens.

1. Body substances of all clients are to be considered infectious.
2. **Handwashing is the major preventive technique.** It should be used:
 - a. Prior to and following any patient contact.
 - b. Immediately, if contact with any body substance onto the skin or mucous membranes occurs.
 - c. After removing contaminated gloves, gowns, or equipment.
3. Needles should not be recapped or broken; instead, deposit them in an approved puncture-resistant container. CDC Brochure: [Sharps Safety for the Healthcare Professional](#).
4. Gloves should be worn if contact with body substances is anticipated. These include:
 - a. Handling of blood, urine, feces, vaginal drainage, saliva, tears, amniotic fluid, breast milk, or wound drainage, including wet dressings and laundry.
 - b. When potential contact with body substances is anticipated (IVs, irrigations).
 - c. When carrying body substances in containers (bedpans, urinals, specimen containers).
5. Added precautions should be taken if splashing of body substances is anticipated, or if contact with eyes or mouth is expected (masks, goggles, gown).
6. Students should be knowledgeable of the nature and risks of body substance transmitted diseases, the mode of transmission, and the appropriate preventive techniques. These concepts are discussed in *Fundamentals of Nursing*.

7. Students with cuts, sores or other broken skin areas on their hands should notify their instructor. Clinical instructors will determine if clinical practice can be carried out by wearing gloves or by applying an occlusive dressing.
8. Any needle-stick injuries with contaminated needles, cuts with contaminated sharp objects, body substance splashes or contact with mucous membranes should be managed following CDC guidelines. **Clinical instructor must be notified immediately.**
 - a. Immediately wash area, student and instructor will report to agency and **follow agency protocol for exposure.**
 - b. The student must complete the [BTC Clinical Exposure Reporting Form](#). (last step after notifying the instructor, the clinical site, and following clinical site procedures).
9. Spills of body substances should be immediately cleaned following agency policy. Gloves should be worn during cleaning and hands washed when gloves removed. The clinical site recommended bactericidal cleaning procedure should be followed.

The following principles should also be recognized:

1. Blood and body fluids transmitted diseases are not transmitted by ordinary contact with patients (bathing, feeding, or touching).
2. Blood and body fluids guidelines are for the protection of patients as well as the health care worker.
3. Gloves must be worn when it can be reasonably anticipated that the student may have hand contact with blood, other potentially infectious materials, mucous membranes, and non-intact skin, when performing vascular access procedures and when handling or touching contaminated items or surfaces.
4. If needed equipment or supplies are not available in the clinical area, the instructor should be notified.
5. After caring for a patient, students should not put hands to face, especially eyes or mouth, prior to washing hands.
6. Students are accountable for the correct implementation of the above procedures.
7. Students are responsible for reviewing agency procedure/policy manual.

Student Health Policy

Students may be exposed to certain risks and dangers in the nursing programs. Students should be aware they will be in close contact with other individuals having a variety of health problems in which the cause may not be known. ALL patients and/or clients must be considered as having the potential to transmit infectious diseases. Students enrolled in the nursing programs who experience injury or who have been diagnosed with an infectious disease or who have been exposed to an infectious disease which could place either clients or others at risk should immediately inform the director of the program.

It is the responsibility of students to inform the director/coordinator/faculty members about conditions of limited functioning (i.e. crutches, surgery, pregnancy, etc.) which could require accommodation of clinical assignments. It is the responsibility of the students to inform the director/coordinator/faculty members about ANY health conditions (mental or physical) or changes in

health status that could place them or their clients at risk. A health care provider's statement may be necessary to assure faculty that the student is able to participate in class and clinical activities without harm to self or others.

Students who meet standards and functional abilities, and medical evidence indicates that their health is not a threat to themselves or others, may continue in the program.

Instructors may allow students to enter approved isolation rooms to participate in patient care once the clinical instructor has determined this is allowed by the clinical facility's policy, the risks for exposure are discussed with the student (including appropriate hygiene procedures), and it is not a restricted isolation. Specific restricted isolation types that students should never care for including, but not limited to: MERs, SARs, tuberculosis, varicella, and bacterial meningitis. Students are also prohibited from screening for the restricted isolation types.

If a patient is put on isolation during the clinical rotation, the clinical instructor will determine if the student should continue caring for the patient or if they should be reassigned based on the infectious organism, the clinical facility's policy, and the potential for cross-contamination.

Final semester nursing students who are completing their capstone hours can be assigned (as allowed by clinical facilities) to all isolation patients except those that are restricted.

Student Accommodations Policy

Students who have a known disability or sincerely held religious belief that requires accommodation must make a request after admission but no later than the first day of class with the college. Newly diagnosed disabilities requiring accommodation must be reported to the administrative office at the time of diagnosis. It is the responsibility of the student to make the college aware of the need for accommodation, in advance, and cooperate with the college's attempts to accommodate the request. The student will be asked to provide details to determine the appropriate accommodation and will be asked to provide documentation. Decisions for accommodation will be made by the Administrative Review (AR) Team.

If approved, the student will receive a written AR summary which includes the accommodation description, time in effect, which course(s)/assignment(s) impacted, and specific instructions for the students and instructor. Once provided with the necessary information, the AR team will make a timely decision and notify the student. The AR Team will notify the instructor(s) and Program Coordinators of the plan. The effectiveness of the accommodation will be measured at the end of each semester, unless required sooner.

There may be more than one accommodation possible—The AR Team will select the accommodation that will be used. Short-term accommodation may be granted (i.e., surgery, hospitalization, treatment for illness). These short-term accommodations may be eligible for renewal at the request of the student, with updated documentation required for approval.

Classroom and Clinical Expectations

Health care professionals are representatives of the nursing profession. The first impression a nurse makes to the client results from what is seen and heard. How a nurse looks, and acts establishes the basis and acceptance from his/her client.

General Appearance and Conduct Policy

- The student may wear street clothes that are modest and well kept.
- The student must be clean and well groomed. No drug, alcohol, or offensive logos.
- The student is expected to conduct himself/herself in a professional manner while attending classes.
- Jewelry may be worn in the classroom only. [See *Clinical and skills lab dress code*.]
- Verbal and /or non-verbal profanity is prohibited.
- Drug Free Environment is strictly enforced.
- The use of illegal drugs or the abuse of prescription medications at any time is grounds for dismissal.
- No midriffs may be exposed.
- No cell phones will be allowed during class or during the clinical rotation.
- Students must adhere to the clinical facility(s) policy and procedures.

Nursing Student Conduct Policy

Student nurses are expected to maintain mature, professional conduct. They are also expected to abide by the policies of the school. Student conduct is expected to reflect integrity and trust. Problems with behavior will require counseling/conference with the instructor of the course or clinical rotation. Serious or repetitive problems of behavior will require counseling/conference with the Program Director. Written documentation will be required, and student will be provided with a copy of the documentation and expectations for correction. Students consistently exhibiting unprofessional disruptive behavior in the classroom may be subject to disciplinary action. Conduct is a critical element considered in evaluation of the student(s).

Students may be terminated for any of the following reasons: failure to follow school rules and regulations, cheating, theft, destroying or vandalizing school or an individual's property (student will be held responsible for cost of any damages), conduct/profanity/gestures/comments or jokes considered undesirable, unethical or unprofessional conduct, insubordination, weapon usage, the possession, distribution, or usage of drugs/alcohol on the facilities or at any school activity. Facilities must be left clean and orderly. Food or drinks may only be consumed in pre-designated areas.

Children are not permitted in instructional facilities and/or clinical facilities at any time.

Professional Conduct Policy

All forms of unprofessional behavior are prohibited and will result in disciplinary action including possible dismissal. It is expected that those who observe incidents of misconduct to provide a written and signed report of such incidents to course faculty or the director of the program as soon as possible.

A. Unethical/Unsafe Professional Behaviors:

Violations include, but are not limited to:

1. Inadequate preparation for clinical rotation
2. Failure to properly notify the supervising or assigned faculty of a clinical absence
3. Falsifying information or reporting falsified information
4. Breach of client confidentiality/Health Insurance Portability and Accountability Act
5. Unsafe nursing practice*

6. Violation of the American Nurses Association's Code of Ethics for Nurses (page 7)
7. Violation of signed Academic Integrity statement

***DEFINITION OF UNSAFE NURSING PRACTICE**

Unsafe nursing practice is behavior conflicting with that expected of a reasonably prudent licensed nurse and has the potential to cause physical or emotional harm to the client. Nursing students will perform within their level of competency, be aware of limitations of their knowledge, have sound rationale for nursing care, and ask for assistance when performing any tasks outside of their level of knowledge or competency. Failure to follow infection control procedures or other safety protocols also constitutes unsafe nursing practice.

Unethical/Unsafe professional behavior may result in dismissal from class or clinical rotation. Additional penalties may apply depending on severity of incident or repeat occurrences.

- B. Academic Dishonesty is defined as students providing or obtaining unauthorized help in academic coursework or accepting recognition for work which is not theirs (Kaufman, 2008).
1. Cheating is behaving in a dishonest way in order to achieve your goal (Cambridge Online Dictionary).
Examples of cheating include, but are not limited to:
 - a. Copying from another student's work, examination paper or other exam instrument (i.e., computer)
 - b. Allowing another student to copy from any work, an examination, paper, or other exam instrument
 - c. Unauthorized use of books, notes or other materials to complete an examination, quiz, project or other academic assignment
 - d. Unauthorized collaboration with others on a test, quiz, assignment or other academic project
 - e. Using or processing unauthorized or concealed materials (such as notes, formula lists, cheat sheets, Web sites) during an examination
 - f. Receiving communications such as, but not limited to notes, text messages, phone messages, computer-based message or nonverbal signs during examinations
 - g. Disclosing examination questions or topics to other students; receiving information about examination questions or topics from other students
 - h. Submission or use of falsified data
 - i. Theft of or unauthorized access to an examination
 - j. Submission of the same work for credit in more than one course, without obtaining permission of all faculty beforehand
 2. Plagiarism is defined as: to steal and pass off the ideas or words of another as

one's own and/or use another's production without crediting the source (Merriam-Webster.com, Retrieved 6/2022)

Examples of plagiarism include, but are not limited to:

- a. Quoting another person's actual words, sentences, phrases, paragraphs or entire piece of written work without acknowledgement of the source
- b. Using another person's ideas, opinions or theory, even if it is completely paraphrased in one/s own words, without acknowledgement of the source
- c. Borrowing facts, statistics, illustrations or other materials that are not clearly common knowledge without acknowledgement of the source
- d. Copying another student's written work, computer file or other academic assignment
- e. Allowing a student to copy written work, computer file or other academic assignment
- f. Collaboration on or sharing of an assignment in any form (written or computer file) which is then submitted as individual work of each student
- g. Submission of the same work for credit in more than one course, without obtaining permission of all faculty beforehand
- h. Unintentional acts of plagiarism are defined as those involving acknowledgement of sources but incorrect use of citations or citation format

Incidents of academic dishonesty result in a zero for the assignment and may result in dismissal from the program.

C. Uncivil Behaviors:

Examples of uncivil behavior include, but are not limited to:

1. Behavior disruptive to the educational process:
 - a. Consistently missing deadlines
 - b. Repeatedly arriving to class late, leaving early, or otherwise coming and going during class
 - c. Sleeping in class
 - d. Using electronic devices during class for purposes unrelated to the course
 - e. Failure to turn cell phones or pager ringers off during class
 - f. Conducting side conversations during class
 - g. Dominating discussion during class

2. Discourteous, disrespectful, and impolite behavior directed toward faculty or other students/persons at clinical facilities or in the classroom:
 - a. Use of profanity
 - b. Rudeness, belittling, or use of judgmental tone
 - c. Taunting, harassing, or bullying
 - d. Yelling, threatening behavior or words, personal attacks, or unfounded accusations
 - e. Use of racial, ethnic, sexual, or other discriminatory slurs
3. Imposing physical harm on faculty or other students/persons
4. Intentionally destroying property
5. Possession of firearms or weapons
6. Violation of the College Drug and Alcohol Use Policy

Faculty reserve the right to not admit students to class who are late until the next class break. Students, who engage in disruptive behavior, are unruly, or who interfere with the faculty's teaching/learning environment will be dismissed from class.

Disrespectful communication, incivility, and behaviors that are distracting to the learning environment will not be tolerated.

Behaviors that are distracting to the learning environment may include but are not limited to:

- a. Intimidation behavior
- b. Refusal to comply with faculty requests
- c. Persistent arguing. Prejudicial statements, rude or uncaring statements
- d. Yelling, eye rolling, foul and/or inappropriate language

Any threats made against faculty or disrespectful conduct will be reported to the director and will result in penalties to the student.

Students Rights and Responsibilities Related to Conduct

It is the student's right to:

1. A quiet, safe, respectful and positive learning environment.
2. Respectful consideration from co-workers, faculty and administration.
3. Assurance of personal and record confidentiality.
4. Communicate with instructors regarding learning needs and program concerns.
5. Competent instruction and achievable objectives.
6. Knowledge and awareness of school policies.

It is the student's responsibility to:

1. Be quiet, dignified, and courteous in the classrooms, the corridors, the lunchroom and any other place where students appear in the school uniform.
2. Report to classes promptly.

3. Be prepared for classes upon arrival to school.
4. Provide a positive classroom environment which is conducive to a positive learning experience.
5. Respect self, classmates, and instructors.
6. Accept responsibility for your thoughts, communication and behavior.
7. Respect the rights of classmates, instructor's, coworkers, and clients.
8. Uphold school policies and procedures.

Technical Support

Technical Support will be available during the following hours:

Monday – Friday	8:00am – 10:00pm CST
Saturday	8:00am – 8:00pm CST
Sunday	8:00am – 11:00pm CST

Students may access the BTC Technical Support Chat on the homepage of our learning management system, Moodle, or by going to https://chat.socialintents.com/c/btc_chat.

Students can expect a response from a technical support agent during the posted hours of operation. Chats sent during 'off' hours will receive a response the next business day. To begin the technical support chat, students will be asked to enter their name, school email address, and reason for chatting.

Computer Requirements

Computers are an essential part of all programs at BTC. All students are required to have a personal computer with word processing software, up-to-date anti-virus software, web camera (with microphone) and reliable, high-speed internet access. A personal printer is highly recommended.

	Minimum	Specific Tech Requirements by Vendor
Operating System: PC	64 bit Version of Windows 10 or higher	McGraw Hill Connect
Operating System: Mac	Mac OS 10.13 or higher	Exemplify
Processor	Intel or M series	ATI
Hard Drive	4GB or higher	Moodle
Memory	RAM 8GB or higher	
Internet Connection	Bandwidth: Minimum 0.5 Mbps upload speed and 2.0 Mbps download speed Resolution: 1024 x 768 or better	
We recommend the following browsers:	Google Chrome 119 or later	DOWNLOAD
	Mozilla Firefox 119 or later	DOWNLOAD
	Safari 14 or later	DOWNLOAD

How to check your internet speed: <https://www.speedcheck.org/>

How to update your Windows OS: <https://support.microsoft.com/en-us/windows/update-windows-3c5ae7fc-9fb6-9af1-1984-b5e0412c556a>

How to update your macOS: <https://support.apple.com/en-us/108382>

Browser Settings
Java script must be enabled: Help
Cookies must be enabled: Help
Pop-ups must be enabled: Help

Bolivar Technical College students may access the Free Version of Microsoft Office 365 for Students. Enroll using your BTC student email at: <http://outlook.office.com/>

Students have access to the LMS Moodle through [Google Play](#) and [Apple App](#) stores by searching for **Open-LMS**. Choose student access and enter learning.bolivarcollege.edu. You may now sign in using your Moodle credentials.

BTC students may use the school's computer labs/library/printer anytime they are available during regular business hours.

Use of Technology and Social Media

Policy: Nursing students may not collect, share, or post any material that could potentially violate patient/family confidentiality or professional behavior guidelines on social media sites. Although Moodle and other online tools used in a nursing course are not considered social media sites, students are expected to observe professional standards for communication in all interactions.

Nursing students must follow the related policies of the clinical sites and the school.

Students may be subject to disciplinary action by the school and the clinical site for comments that are either unprofessional or violate patient privacy. HIPAA regulations apply to comments and images made and shared on social networking sites. Violations involving Moodle or other online tools are subject to the same prosecution as with other HIPAA violations.

Students are expected to conduct themselves as professionals, and, therefore, should refrain from negative posts regarding school, courses, classmates, or instructors.

Guidelines:

1. Social media includes but are not limited to blogs, podcasts, discussion forums, online collaborative information and publishing systems that are accessible to internal and external audiences (i.e., Wikis), RSS feeds, video sharing, and social networks like Instagram, Twitter, and Facebook.
2. Collecting, sharing, and posting on social networking sites are subject to the same professional standards as any other personal interactions. The permanence, worldwide access, and written nature of these postings make them even more subject to scrutiny than most other forms of communication.
3. Restricted postings include but is not limited to protected health information – individually identifiable information (oral, written, or electronic) about a patient's physical or mental health, the receipt of health care, or payment for that care.

4. Online postings or discussions of specific patients are prohibited, even if all identifying information is excluded. It is possible that someone could recognize the patient to which you are referring based on the context. Remember, if you wouldn't want YOUR own health information being posted to the internet, do not post that of anyone else.
5. Under no circumstances should photos or videos of patients or photos depicting the body parts of patients be taken or displayed online.
6. Statements made by you within online networks will be treated as if you verbally made the statement in a public place.

Electronic communication and information devices are a part of everyday life for most people today. However, learning to be a professional nurse includes discriminating when, where and how technologies are to be appropriately utilized. Students should use hospital or agency computers for patient care related tasks only. Students are not allowed to use hospital computers for Facebook, personal email or any other use.

Staff use always take priority over student use of the computers. It is essential that faculty clarify with managers and staff, before students begin clinical, what access students will have to the computers at the clinical site where students are placed.

Students are not allowed to use electronic devices for personal reasons while in a clinical setting. Use of electronic charting, for clinical assignments may be done at the approval of your clinical instructor. Students may only use their phones on lunch or dinner break, or by special arrangement with the clinical instructor.

Instructors are to bring any violations to the attention of the course coordinator immediately.

Source: Modified from Wegmans School of Nursing- St. John Fisher College, Rochester, NY, Clinical Instructor Guidelines & Information (2013).

Artificial Intelligence (AI) Policy

Generative artificial intelligence (GAI) and Applied Artificial Intelligence (AAI) tools have strong potential to support learning and improve communication. They also have clear dangers for abuse that can lead to hindering the learning process and providing false information. All students enrolled at Bolivar Technical College are subject to the school's academic integrity policy (Bolivar Technical College, 2024-2025).

Unless otherwise specified by the course instructor, it is a violation of Bolivar Technical College's academic integrity policy for students to use GAI to create all or part of an assignment and submit it as their own work. General, permissible use of GAI includes seeking clarification on concepts during study, brainstorming ideas, or generating scenarios for practice. GAI may also be used as an assistive tool to draft emails or other non-coursework communication. Students are never permitted to upload course materials/content or assignments to AI tools.

This policy is applicable to all current and future AI-based tools and is aligned with the school's academic integrity policy.

If an instructor allows the use of GAI for an assignment or activity, it will be implicitly stated in the course syllabus and/or the assignment instructions with parameters for AI use. Any submitted work on the student's behalf should include proper citation of the AI tool used.

<https://www.grammarly.com/citations/apa/generative-ai> (Grammarly INC, 2024). AI integration into the teaching and learning process should focus on responsible use, inclusivity, and maintenance of high ethical standards.

If there is ambiguity surrounding the use of a GAI tool for any school-related activity, the student is responsible for seeking clarification from the Course Instructor, Program Coordinator, or Director of Nursing Education. Students are solely responsible for proper citation of any research materials used.

Users must be aware that when they enter their own original material into a GAI tool, there is a chance that the student's own intellectual material may become part of the tool's models. In this case, others will have access to and free use of the work and information. Conversely, if using GAI to develop an individual's own original work, it may include other's copyrighted materials.

Medical Marijuana Policy

Marijuana is classified by the federal government as a Schedule I Controlled Substance and therefore illegal for use. Though individual states have legalized both medical and recreational use of the substance, including the State of Missouri, it is still considered to be illegal by the [National Council of State Boards of Nursing \(NCSBN\)](#), the [Missouri State Board of Nursing \(MSBN\)](#), and Bolivar Technical College (BTC). Use of illicit substances is grounds for denial, revocation, or suspension of Missouri nursing license (MO [335.066](#)).

Bolivar Technical College therefore does not recognize medical marijuana cards as permission to use a schedule I controlled substance, nor does it allow recreational use at any time. See drug testing policy for information regarding screening for substances.

The NCSBN recommends that the curriculum of prelicensure nursing programs include information about marijuana use in medicine (Page 29 of [NCSBN National Nursing Guidelines for Medical Marijuana](#)). Students of BTC are instructed regarding medications and treatments that contain cannabis, cannabidiol, and THC including regulations, physiologic processes, associated disease processes, and risks/benefits of these treatments.

Students will also be instructed which medications contain marijuana derivatives and can be administered by prescription by a licensed nurse as well as which formularies cannot be administered by a licensed nurse. Students will identify the concept of a designated caregiver and the actions associated with this role. Students will not administer marijuana or cannabis in the clinical setting, nor will they act as a designated caregiver for an assigned patient receiving cannabis-based treatments. Students may care for patients who use illicit substances while in the clinical setting.

Students at Bolivar Technical College are subject to drug testing. A positive drug test for marijuana use (THC positive) will result in immediate dismissal from the program. There is no waiver available for those that have medical marijuana cards. Students should be aware of CBD based products. According to BTC's contracted drug testing company, some CBD products such as lotions and oils may contain THC—the psychotropic part of marijuana that is tested in a drug screen in trace amounts. This may not be listed on the label depending on manufacturer and regulatory oversight of production and distribution. When used daily, these substances can have a cumulative effect that causes a positive drug test. As there is no way to confirm the source, again, any positive will result in dismissal.

BTC Nursing Faculty Members develop curriculum and clinical experiences that promote Humanistic Theory in caring. This theory recognizes the value, worth, and dignity of each person placed in the care of the nurse. As a result, caregivers should be free from mind altering substances that may cause harm to vulnerable patients. According to the NCSBN, "Nurses who abuse substances pose a unique challenge to the nursing profession. The behavior that results from this disease has far-reaching and

negative effects, not only on the nurses themselves, but also upon the patients who depend on the nurse for safe, competent care.”

NCSBN [What You Need to Know About Substance Use Disorder In Nursing](#)

Drug and Alcohol Prevention

Bolivar Technical College is committed to providing a healthy, safe, and learning environment for their students, faculty, staff and guests. Part 86, the Drug and Alcohol Abuse Prevention Regulations (EDGAR) requires, that, as a condition of receiving funds or any other form of financial assistance under any federal program, an institution must certify that it has adopted and implemented a program to prevent the unlawful possession, use, or distribution of illicit drugs and alcohol by students and employees both on school premises and as a part of any of its activities.

BTC has created a program that complies with the Drug-Free Schools & Community Act (DFSCA) to do the following:

1. Annually notify each employee and student, in writing, of standards of conduct; a description of appropriate sanctions for violation of federal, state, and local law and campus policy; a description of health risks associated with alcohol and drug use; information on available treatment programs.
2. Develop a sound method for distributing annual notification information to every student and staff member each year.
3. Conduct a biennial review on the effectiveness of its alcohol and drug use program and the consistency of sanction enforcement.
4. Maintain its biennial review material on file so that, if requested to do so by the US Department of Education, the campus can submit it.

DFSCA Biennial Review Information

The regulations do not specify a date by which the biennial review must be completed and on file – they simply require that a campus complete a review every two years. Since the regulations went into effect in an even-number year (1990), BTC will conduct a biennial review by the end of each even number calendar year, and the review will be conducted by the President, Campus Director, and Registrar.

Documentation

Reports filed through the disciplinary process are made available for review to determine whether incidents or types of reports are increasing. Any changes in prevention or intervention initiative can then be made to address trends. Within the last two years, no student has been terminated from any program due to alcohol abuse or illicit drug usage.

Policy/Program

BTC has a zero tolerance for drug or alcohol usage on school premises or at any facility used by the school for additional training.

Through an assessment of the previous two years of activity, the following components have been identified as actively in place:

1. Mandatory drug screening for acceptance into any nursing program.
2. Random drug screening for any student or employee if deemed necessary.
3. Information session regarding drug and alcohol abuse/prevention is given during student

orientation at the beginning of each new program and in the student catalog.

4. Drug and alcohol abuse prevention is embedded throughout the curriculum utilizing a variety of methods to include but not limited to guest speaker expertise, field trips, clinical rotations, classroom assignments & projects, etc.
5. Employees are provided with information on policies related to alcohol and illicit drug use through distribution of the Employee Handbook.

The consumption of ALCOHOLIC BEVERAGES and ILLEGAL DRUGS on the property of BTC is ABSOLUTELY PROHIBITED, and violators will be prosecuted by local law enforcement agencies. Prohibited unlawful use includes violation of the Missouri law prohibiting possession or use of alcohol by persons under 21 years of age and all other state and federal laws regulating use, possession or distribution of alcohol or drugs. Also, prohibited are the unlawful or unauthorized use and/or possession of narcotics, drugs, drug paraphernalia and/or other chemicals; the distribution and/or sale of alcoholic beverages and the unlawful or unauthorized distribution and/or sale of narcotics, drugs and/or chemicals. Students and employees are notified that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance or alcohol on the school's property or as part of the school's activities are prohibited and will be grounds for immediate dismissal from a program or employment. Any student or employee whose behavior is illegal, endangering the safety of students or employees, or considered to be disruptive to normal college activities will be dismissed immediately. Those employees or students dismissed for illegal behavior will be reported to the appropriate authorities and subject to the penalties of federal, state, and city laws.

Legal Sanctions

Local, state, and federal laws prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to \$20,000 to imprisonment for terms up to and including life.

Health Risks: Specific serious health risks are associated with use of illegal drugs and alcohol.

Some of the major risks are:

- Alcohol and other depressants (barbiturates, sedatives, and tranquilizers): addiction, accidents as a result of impaired ability in judgment, overdose which can result in death, damage to a developing fetus, heart and liver damage.
- Marijuana: addiction, panic reaction, impaired short-term memory, increased risk of lung cancer and emphysema, and impairment of driving ability.
- Cocaine: addiction, heart attack, seizures, lung damage, severe depression, paranoia, psychosis. Similar risks are associated with other stimulants such as speed and uppers.
- Hallucinogens (acid, LSD, PCP, MDMA, etc.): addiction, unpredictable behavior, emotional instability, violent behavior, organic brain damage in heavy users, convulsions, and coma.
- Narcotics (heroin, Demerol, Morphine, Codeine, etc.): addiction, accidental overdose, and risk of hepatitis and AIDS from contaminated needles.
- Inhalants (harmful gases and aerosols, glue, nitrous oxide, etc.): loss of consciousness, suffocation, damage to the brain and central nervous system, sudden death, nausea and vomiting, nosebleeds, and impaired judgment.

A drug screen may be requested of a student and/or employee who demonstrates drug and/or alcohol use. All expenses related to screening, counseling, treatment, and rehabilitation are the responsibility of the student and/or employee.

If a student or employee is terminated from a program/employment for positive results on a drug screen, and he/she wishes to appeal the decision, the following steps must be completed:

1. Notify the program director or campus director in writing within 24 hours (excluding weekends) following termination of the decision to appeal. This time limitation is due to the time constraints concerning specimens maintained by the laboratory.
2. Request that Sample B of the split sample specimen be sent to a second independent laboratory for testing. ALL FEES for this additional testing are the responsibility of the student/employee and must be paid at the time the appeal is submitted.

The findings from the second independent laboratory are final, and decisions made regarding student/employee retention resulting from those findings are final.

BTC strongly encourages a student or employee who might be dealing with a drug or alcohol abuse to seek counseling, treatment, and/or rehabilitation. BTC will aid with referrals or other methods to connect the student or employee with counseling, treatment, and/or rehabilitation. The drug and alcohol abuse resources are available in the near-campus community, on-line, and/or by telephone.

The following contact numbers and hotlines are available for counseling, treatment and rehabilitation:

Bolivar Technical College Nursing Curriculum Framework

The Bolivar Technical College nursing faculty have identified the following nine standards on which to base the nursing programs curricula. The faculty believe that this framework represents essential areas of nursing practice from which to develop graduate competencies (end of program student learning outcomes) and course learning outcomes.

Bolivar Technical College Curriculum Framework

Graduate Competencies (End of Program Student Learning Outcomes)

Upon Completion of the Bolivar Technical College Practical Nursing Program, the Graduate Practical Nurse will:

Essentials from the Sciences and Liberal Arts

Combine knowledge, principles, and theories of other disciplines and areas of study into nursing care.

Interprofessional Communication and Collaboration

Collaborate within health care teams, using open communication, mutual respect, and shared decision making for planning, delivery, and revision of optimal nursing care.

Social Justice, Advocacy, and Cultural Competence

Create an environment that promotes caring and professionalism with consideration for the client's cultural/societal beliefs and practices.

Nursing as a Role in the Healthcare System Today

Develop skills and knowledge to implement safe, effective, therapeutic and holistic nursing care.

Disease Prevention and Health Promotion

Advocate for clients in a way to promote self-determination and health while reinforcing client education for positive outcomes.

Patient Safety, Evidence-based Practice, and Quality Care

Create an environment of safety.

Clinical Decision Making

Formulate thinking processes and strategies to evaluate data and choose interventions.

Professional Values

Define responsibility and accountability for the effectiveness of one's own nursing practice and professional growth as a learner, clinician, and team member within the parameters and expectations of scope of practice.

Upon Completion of the Bolivar Technical College Professional Nursing Program, the Graduate Professional Nurse will:

Essentials from the Sciences and Liberal Arts

Combine knowledge, principles, and theories of other disciplines and areas of study into nursing care.

Interprofessional Communication and Collaboration

Delegate and evaluate care appropriately, according to the client need, ability of the delegate, and scope of practice for the purpose of optimal nursing care.

Social Justice, Advocacy, and Cultural Competence

Administer professional nursing care competently and safely in diverse settings, utilizing leadership, clinical judgement, and therapeutic nursing interventions with individuals, families, and communities at any developmental stage and with varied beliefs and health concerns.

Nursing as a Role in the Healthcare System Today

Incorporate skills and knowledge to implement safe, effective, therapeutic and holistic nursing care including meeting physiological, psychological, cultural, and spiritual needs of the client.

Disease Prevention and Health Promotion

Explain and remove barriers to health promotion.

Patient Safety, Evidence-based Practice, and Quality Care

Incorporate best practices based on current evidence into safe, effective, competent, nursing care with concern for client/family preferences and values.

Information Systems and Health Care Technologies

Explain technologies used to strengthen communication, manage information, and mitigate error in client care delivery.

Clinical Decision Making

Design and/or revise interventions for patient care based on evaluation of patient goals and data for direction of the nursing care team.

Professional Values

Summarize the responsibility and accountability for the effectiveness of one's own nursing practice and professional growth as a team leader, clinician, and educator within the parameters and expectations of scope of practice.
